

The readers of the RECORD-UNION leaving the city for the heated term can have the paper sent to their address for 50 cents per month, postage prepaid.

## OF AWNINGS AND SIDEWALKS.

Some flimsy objections have been raised to the rolling screen awnings. Now the RECORD-UNION is not concerned in the manufacture or sale of any particular kind of sun shade. It is only concerned in seeing the old post-awnings taken down, for the simple reason that on one side of all streets there is no need for awnings at all, and on the other side the absence of the post awning can be supplied by several styles of light and ornamental shades. The best of these, because the most durable and least likely to get out of repair or become shabby, are cloth shades speedily down, are rolling metal screens, or permanent iron hanging screens. The first are the best; they are made of overlapping strips of thin metal hose riveted, which roll around a shaft hung in sockets over the doors or windows, or along the entire business front. A simple crank device is used to roll them up out of the way. They will not burn, do not rot, are strong and never warp out of shape or become shabby. In case of fire they are quickly rolled up and the firemen have free access to the front of the building. They have been in use for many years in San Francisco, New York and Eastern towns generally for a quarter of a century, are not controlled by any monopoly, and are not the subject of speculation a whit more than are the cloth folding awnings, or the post abominations.

It is the easiest thing in the world for those who do not want to improve the appearance of the city to raise objections and pick flaws in propositions of advancement. So far as awning improvements are concerned the movement is now under way, and it is going ahead despite the fears and doubts, and its fruits will be the question, and the "stone-in-the-mill" argument. One doubter, who claims to be a scientific and traveled man and ought to know better than to suggest such absurdity, asks if the firemen will have any difficulty footing on the metal and slatted awnings, or on the old style. Bless the innocent man's soul, one of the very purposes of having movable or rolling awnings to supplant the post nuisances, is to give the firemen freedom to get upon and into buildings. The followinging is turned up against the house front in an instant and secured in its box or cover, thus leaving sixteen feet between the electric wires and the building in which to erect ladders. As it is now, there are several places in the city where it is next to impossible to erect ladders from the street against house fronts, because the wires run along and completely block the awning fronts. But these objections to which we refer are futile. Any man with an idea in his head knows what is meant by a folding sun shade for a house front, and if there remain any who have not heard or seen of such shades, let them open any magazine or illustrated paper containing pictures of street scenes in the East, and they will not fail to notice the awnings to which we refer.

The truth is that there ought to be no hesitation whatever by the city authorities in condemning the objectionable awnings in the city, one half of which are unsafe, an offense to the sight and a positive detriment to the city in many ways. At the same time the authorities should condemn all the old cordway sidewalks on business streets, and give owners six months, or less, in which to replace them with something that can be trod with safety, if not with comfort. As proof of the necessity for such action let us relate one conversation on the subject. A visitor from a neighboring city who is surprised at the slowness with which such improvements as are needed here are pushed, the other day asked an owner of a shabby, dilapidated and insecure sidewalk on the north side of K street, why in the name of common decency he did not repair them.

"I cannot," replied the landlord, "the city forbids it—I will have to put down new ones of other material."

"Well, why not do it now?" was asked, and the reply was significant:

"Oh, I will, some time. It won't cost any more then, than now, maybe not so much, and though these walks have been condemned twice, they don't push you here. You see, they condemn, but they let things run on, and I'm going to let my walks go as long as they let me."

Is any common necessary upon such a truthful confession and frank statement.

## UNWISSE MANIFESTATIONS.

In the National Temperance Congress several members in their rage declared their desire to spit upon the Constitution and stamp upon it with their boot heels. There was no one holding these worthy gentlemen from making that demonstration of anger. Had they spat and stamped, the nation would not have turned aside to notice the action, save in pity.

The truth is that the interference of the Congress dispensed some of the most thoughtful members, and one, Mr. Graham, has apologized in a printed letter to the trouble, that the philanthropy of these enthusiastic and devoted people is praise-worthy, but they are unwise in their methods, for, as *Harper's Weekly* remarks, in their cause the question is one wholly of method. Drunkenness is an evil, how shall it be prevented? That is the premise and the inquiry of conclusion of the whole matter.

Whatever method is best, must make it effective, have behind it the sentiment of the people such as fortifies any other effective method of organized society. When, therefore, a temperance Congress condemns all men who are not in accord with a single proposed method, it repels a sentiment which it ought to cultivate. "To be right is to be radical," is an epigram that does not apply in the temperance cause, but "to be right and wise in the right," is a fitter motto for a reformation party that has to deal with men's beliefs rather than with their political beliefs. Certainly spitting on the Constitution or grinding it under the heel on convention floors, are not methods to be approved in the working of reforms that can calm and deliberate manifestations of wisdom.

## NOTE AND COMMENT.

The Woodland Mail has just issued an eight-page "horticultural edition" which contains a vast amount of valuable information in regard to Yolo county.

There is likely to be a livelier contest at the primaries on Saturday than at the general election this fall.

## SWIMMING BATHS.

## A MEETING RESOLVES THEY SHALL BE BUILT.

It Opens a Stock Subscription Bazaar, and Proposes Immediate Action.

The RECORD-UNION has for two years pressed the subject upon public attention establishing warm and cold swimming baths in this city, but not until last evening was there any positive action taken looking to realization of the idea, one which is universally commended, and to which no citizen has ever raised the slightest objection.

The benefits of such an institution are almost countless, and the only reason why they have not been enjoyed here is that the right start has not been made. Three swimming baths have been put up in San Francisco, the first was destroyed by fire, the second was a float in the river and fire, adapted to general use, the third was a small bath, and fell into disrepute by being used by a few dissipated and dissipated people, and that killed it.

THE MEETING. Of last night was called by the RECORD-UNION to assemble at Y. M. I. Hall, the sole purpose of this gathering was to have a test made whether the people would act when the opportunity offered to secure swimming baths, and conduct a stock subscription. Our evening committee, consisting of Messrs. A. B. Bonheim, J. C. York, of the firm of York, C. A. York, and H. L. Lusk, were called to the chair, and Mr. A. B. Bonheim was chosen secretary. On taking the chair Mr. York expressed himself emphatically in favor of establishing the baths, and expressed the hope that the movement would be their immediate establishment. He then called for expression of the views of those present, and the following were called out and spoke:

MR. WOODSON said that he had studied the subject with care and had consulted with the most experienced bathers. Wherever established and well conducted in this State, he found they had paid. In San Francisco, he found they had paid, but not better than in Fresno, San Jose, Monterey and other cities. He had secured many estimates of cost of establishing, from \$10,000 to \$20,000. He had also secured many estimates of the value of such a bath, and found that it would be worth from \$10,000 to \$20,000. He had also secured many estimates of the value of such a bath, and found that it would be worth from \$10,000 to \$20,000.

A. Bonheim said he was warmly in favor of establishing the baths. He was satisfied that it would be a great benefit to the city, and that it would be worth the money. He had also secured many estimates of the value of such a bath, and found that it would be worth from \$10,000 to \$20,000.

Every man, woman and child ought to be taught the invigorating, healthful, delightful exercise. He had written and assisted in the construction of the most elegant three-story bath in the city, and he was sure that it would be worth the money.

Related his experience in visiting Europe and America, and he found that the most healthful and invigorating exercise was swimming. He had written and assisted in the construction of the most elegant three-story bath in the city, and he was sure that it would be worth the money.

Spoke of the benefits of the baths and his experience in teaching swimming and his efforts to get the city to build them. He had written and assisted in the construction of the most elegant three-story bath in the city, and he was sure that it would be worth the money.

Chairman York said that it might be too early to name a committee on site and plan, but he would do so as soon as possible. He had written and assisted in the construction of the most elegant three-story bath in the city, and he was sure that it would be worth the money.

Chairman York said that it might be too early to name a committee on site and plan, but he would do so as soon as possible. He had written and assisted in the construction of the most elegant three-story bath in the city, and he was sure that it would be worth the money.

Chairman York said that it might be too early to name a committee on site and plan, but he would do so as soon as possible. He had written and assisted in the construction of the most elegant three-story bath in the city, and he was sure that it would be worth the money.

They needed. It is useless to talk of the benefits of the exercise of swimming—they are all conceded. In San Francisco there are only four such baths. Every one pays largely on the investment. Now an association has been formed for the purpose of erecting one at Sutter and Stockton streets. The capital stock is \$200,000, of which \$100,000 is in the franchise and \$100,000 for fitting up, pipes to salt water, engines, buildings, etc. Nearly all the stock is subscribed and the investors calculate to make two per cent. a month. The investments here are greater than in any other city. In proportion to the population, far more would use them here than in San Francisco. Therefore, the investment is profitable. But the building must be attractive, comfortable, clean, the water freshened and the place made a pleasant resort. It can then, in his opinion, be made to pay from \$5 to \$10 per cent. and a profitable money investment, to say nothing of the value it will be to the city in many ways.

A YOUNG MAN'S VIEWS. T. W. Madley said he was in favor of the baths by all means. They ought to be located as near the business part of town as possible. The first was destroyed by fire, the second was a float in the river and fire, adapted to general use, the third was a small bath, and fell into disrepute by being used by a few dissipated and dissipated people, and that killed it.

SCHOOL DIRECTOR SENATZ said that he thought that all that are of mind, is to get to work. He moved the appointment of a committee of five to take stock subscriptions, and see if the people would bid the work go on. We must get it at once and act with vigor. The motion was put and carried.

THE RESOLUTIONS. The following resolutions were presented and adopted with applause, to give the committee, when named, some foundation to work upon:

Resolved, by the citizens meeting, now assembled, that warm and cold swimming baths of thoroughly good order are needed and should be established in Sacramento.

Resolved, that we believe they can be made a good, paying investment to the stockholders.

Resolved, that such baths should be established.

Chairman York then named the committee: A. B. Bonheim, Thos. Hage, J. A. Woodson, V. S. McClatchey, W. L. Walling, Mr. Hage declined, because it might be thought he had personal interest to serve when he had none.

## BASEBALL SURPRISE.

THE LOCAL CLUB OWNERS APPEAL TO THE PUBLIC FOR AID.

They say the Club is Not Making Money, and Besides They Want Another Star Pitcher.

The following circular, printed in type-writing style, has been sent out by the Managers of the Sacramento Baseball Club, to a large number of the baseball devices in this city:

SACRAMENTO, July 15, 1890.

Mr. \_\_\_\_\_, Sacramento, Cal.: The Managers of the Sacramento Baseball Club have been informed that the other clubs in the California League are about to strengthen their ranks by procuring new men for the positions of pitcher, catcher, and first base. It is possible, therefore, that this particular position, being the most important, will be filled by a player of unusual ability. We are anxious to secure a player of this class, and we are sure that you will be glad to help us in this endeavor. We are sure that you will be glad to help us in this endeavor. We are sure that you will be glad to help us in this endeavor.

For the purpose of securing a winning ball team, we are offering a subscription for a new pitcher, catcher, and first base. We are sure that you will be glad to help us in this endeavor. We are sure that you will be glad to help us in this endeavor. We are sure that you will be glad to help us in this endeavor.

Accompanying the circular is a slip of paper, on which is printed the following:

SACRAMENTO, July 15, 1890.

Mr. \_\_\_\_\_, Sacramento, Cal.: The Managers of the Sacramento Baseball Club have been informed that the other clubs in the California League are about to strengthen their ranks by procuring new men for the positions of pitcher, catcher, and first base. It is possible, therefore, that this particular position, being the most important, will be filled by a player of unusual ability. We are anxious to secure a player of this class, and we are sure that you will be glad to help us in this endeavor. We are sure that you will be glad to help us in this endeavor. We are sure that you will be glad to help us in this endeavor.

If the assertion made in the circular by the managers, to the effect that they are financially distressed, is true, it is a matter of considerable surprise, as it is well known that the club has been successful in its financial management. It is said that the "Senators" are drawing \$1,750 per month in salaries, and it is very reasonable to suppose that the club is in a position to pay the salaries of its players. It is said that the club is in a position to pay the salaries of its players. It is said that the club is in a position to pay the salaries of its players.

The Sacramento club does not, apparently, need another pitcher. It is said that the club has three such men as Coughlin, Harper and Hoffman. The acquisition of another pitcher would be a needless and extravagant expenditure of money. Both the local managers and the players are cheerful, and do not seem to be in any financial straits. It is said that the club is in a position to pay the salaries of its players. It is said that the club is in a position to pay the salaries of its players.

In conclusion he said: "There are only two teams in the State League either of which I would care to join. One is the Sacramento or the Oakland team. These two draw well wherever they play, and don't you forget to remember that one of the best-paying of the Leagues is the Sacramento. The present owners of the Sacramento League franchise have been very successful in their management. This success has been made possible by the liberal patronage that the people of this city have extended to them. It may be that the financial returns have been disappointing, but the fact is one of the greatest local surprises of the year."

THE SUPERVISORS.

What Was Done at Yesterday's Session—

At yesterday's session of the Board of Supervisors, Mr. Bates offered a resolution instructing the Clerk to advertise for bids for printing and binding the precinct registers for this year. The resolution was adopted.

The Board then took up for consideration the matter of the restricting of the county election precincts. The report thereon was finally adopted and the boundaries established.

On reassembling in the afternoon the Board went into session as an assessment board, and at 3 o'clock started in to have the entire assessment roll read to them. As it would take several days to complete such an undertaking, it is not likely that Supervisor Bates (on whose motion it was begun) will insist on hearing more than a few pages read.

The following applications for reductions in assessments have been filed in addition to those already published:

J. M. Watt, on improvements on lots 14 to 16, in Florin, from \$1,200 to \$200.

George H. McIntyre, on 144 acres in Swamp Land Survey No. 507, from \$4,500 to \$2,000.

J. M. Gleason, on land on Andrus Island, from \$15,480 (\$80 an acre) to \$11,550, or \$80 an acre.

Philip Kuhn, on 40 acres in Swamp Land Survey No. 550, from \$800 to \$400.

Same, on 199 acres on Brannan Island, from \$870 to \$420.

John G. Rae, on 20 acres in Ferris Addition to Grant and 30 acres in sections 20 and 32, from \$870 to \$6,500.

John Klotz, on 184 acres in Swamp Land Survey No. 149 and 272, from \$15,640 to \$3,200.

F. H. Russell, on merchandise, from \$5,000 to \$500.

Jerome Madden on improvements on the north half of blocks 20 and 21 (in Brannan's Addition), from \$1,200 to zero, there being no improvements on the property.

M. E. Runyon, on improvements on 306 acres in Swamp Land Survey No. 308, from \$20,000 to \$8,000, and on \$36,720 on the land to \$23,010.

F. B. Green, on 66 acres on Randall Island, from \$5,000 to \$400.

J. S. Harrison, on 179 acres on Andrus Island, from \$7,830 to \$3,000.

## THE WORK COMPLETED.

RIVER LANDS IN YOLO WILL SOON BE FREE FROM WATER.

How the Paine Break Was Closed—A Great Work Well Done—Obstacles Encountered.

By invitation of Assemblyman J. G. Murray, of Humboldt county, who is acting as Assistant Superintendent of the Government work being done at the Paine break, on the Yolo levee, a representative of the Record-Union paid a visit yesterday.

The original purpose of Major Heuer in applying to this purpose a portion of the funds in his possession for use on the Sacramento river, was not, as has been generally supposed, the building of a water-tight levee, but to erect such a water-break as would deflect the current, or the larger portion thereof, into the main channel of the river, and thus scour out the bars that had formed below the break.

To this end a contract was let to James Simpson, of Eureka, Humboldt county, for the driving of two parallel rows of piles across the crevasse, properly secured, and filling in the inclosed space with brush mats, weighted down with sand-bags, to the height of twenty-three feet above low-water mark.

After making the necessary soundings, Mr. Simpson, in order to establish the accuracy of the contract survey, began work at the end of the great crevasse with a floating pile-driver, by which the piles were driven to the bottom of the river, and transfer his operations to the shore.

The contract called for the use of piles of the length of thirty feet, which were estimated, would furnish ample strength against the rushing torrent; but, soon after a few were placed in position, it was found they would not answer, and Captain McIntyre, United States Inspector, who was in charge of the work, ordered a discontinuance, until such time as the contractor could procure piles sixty feet in length, or double the length of those specified in the contract.

Another difficulty here presented itself in the rising of the river, which greatly increased the volume and force of the current. As an instance of the difficult nature of the work, Mr. Simpson explained, with a sigh, that one pile, which had taken a force of twelve men seven hours to place in position, popped out of its place and floated off. Still, in spite of all obstacles, the great work had nearly been completed. Major Heuer has ordered an additional layer of brush and bags, to render it more compact.

In the construction of this work, which is 1,100 feet in length, some 500 piles have been driven, and about 60,000 bags of sand, 4,400 bags of brush, and nearly 100,000 feet of lumber employed to brace and strengthen it.

Every portion of the detail, in addition to the supervision of Messrs. Simpson and Murray, has been personally inspected by Captain McIntyre, and this duty was thoroughly performed, as the result of a measurement of every cord of brush, the counting of every pile and piece of lumber used thereon, after which it was further inspected by Major Heuer.

The work was not done for the purpose of ornamentation, but with an intent to great strength and endurance, and will afford a secure facing for such levee as will have to be built back of it when the water falls sufficiently to permit.

FOR SOCIETY.

Convention of the Women's Christian Temperance Union.

The first County Convention of this Association was held to-day at 10 o'clock in the Sixth-street M. E. Church. The session will open at 10:30 o'clock a. m. with devotional exercises by Mrs. E. M. Carley.

The afternoon session will commence at 2 o'clock, and the order of business will be as follows:

Devotional exercises (Bible reading), Mrs. W. D. S. Hart, address of welcome, Mrs. R. G. Hart, response, by the State President, Mrs. R. R. Johnston; roll-call, Mrs. Maggie Willis; reports from local societies.

In the evening the exercises will be: Anthem, chorus, devotional exercises, Mrs. A. C. Constable, address of welcome, Mrs. R. G. Hart, response, by the State President, Mrs. R. R. Johnston; roll-call, Mrs. Maggie Willis; reports from local societies.

The Exchange adopted the suggestion, and passed a resolution that Major Heuer be requested to instruct the engineer in charge of the navigation on the river, to remove the obstructions to navigation now existing above that point.

THE SUPERVISORS.

They Obstruct Navigation North of Butte City.

Captain J. H. Roberts, of this city, who has steamers employed on the Sacramento river, and yesterday sent the following telegram to the managers of the San Francisco Produce Exchange:

Produce Exchange: Wait on Major Heuer, of the United States snag-barge and urge him to remove the obstructions to navigation on the river for steamers to move now. We have built above Butte City unless something is done.

The Exchange adopted the suggestion, and passed a resolution that Major Heuer be requested to instruct the engineer in charge of the navigation on the river, to remove the obstructions to navigation now existing above that point.

The Pioneer Milling Company are now engaged in tearing down the shed and large wharf attached to their mill, preparatory to the building of a new wharf on the river, which will extend the entire length of the mill. The new wharf will be built on a more substantial manner than the old one, and will be higher than the old one, so as to be even with the main floor of the mill.

A Faithful Public Servant.

Mr. Gorman, the street sprinkling contractor, who has been in the southeast corner of the city (south of E. street) is deserving of considerable credit for the manner in which he is fulfilling his contract. Twenty-first street, which is the main thoroughfare leading to the Freeport road, is being sprinkled in better shape than ever before, and the people living along it daily, all speak well of the faithful manner in which the work is done.

YESTERDAY'S DELIGHTFUL WEATHER.

The Signal Service temperature at 5 a. m. and 5 p. m. yesterday was 54° and 82°, while the highest and lowest was 84° and 54°, with brisk southerly winds and a clear sky.

The highest and lowest temperature one year ago yesterday was 86° and 54°, and one year ago today 94° and 54°, with gentle northerly winds and a cloudless sky.

A Female Wreck.

An unfortunate woman, who gives the name of Conchita, was confined in Justice Henry's Court yesterday of vagrancy and sentenced to sixty days in the County Jail. She is a dissolute person, who has been leading a rough life in the vicinity of the river. She has four children, and a sister-in-law in San Francisco is caring for, and a husband who is working about Elk Grove.

A Housewreck at Auction.

Bell & Co. will sell to-day, on the premises, at 10 o'clock a. m., the east half of lot No. 6, in the block bounded by Thirteenth and Fourteenth, O and P streets, 40x160 feet, with all the improvements—good house of six rooms, sets and pantries, all hard finished; choice fruit trees and shrubbery, high lot, stable and other improvements.

A Long Freight Train.

Freight train No. 57, which arrived yesterday morning from Lathrop, was one of the largest, if not the largest, that has come over the road from that point. There were forty-one loaded cars in it. One engine succeeded in bringing in the whole train.

Not That Kind of Sullivan.

Charles Yates was fined \$5 in the Police Court yesterday for striking a man named Sullivan. The latter is not related in any way to the Sullivan of Boston, or Mr. Yates would not have lived to show up in the Police Court.

Summer Clearing Sale at Red House.

Commencing to-morrow at 9 o'clock: Heavy, unbleached muslin undershirts for 6c; natural merino ribbed undershirts and drawers; 3c; fancy striped Balbriggan undershirts and drawers; 3c; hosiery of other brands at Red House.

Races at the Track To-day.

One trotting race, to harness, best three in five. Another race against time. Gate free. Horses to start at 2 o'clock p. m.

Clothing, Hats, Boots and Shoes.

In our summer clearing sale, commencing to-morrow at 9 o'clock. Undershirts, 5c; white vests, 5c; Red House.

Pay \$3 per month and buy a Doberman Pinscher or New Home Security Alarm, at A. J. Posner's, Ninth and J streets.

## THE BEST GRADES.

The aim in Men's Clothing should be simplicity, perfection of cut, and style that will make most of the advantages and defects of the figure.

The best grade of Ready-made Clothing of to-day is cut and designed on exactly this principle. It is shaped after perfect models, and all parts are in exact proportion. It shows to the best possible advantage a good physique, and covers up in a large degree the defects of a bad one. Some of the best talent in the country is employed in its creation. Not a few New York manufacturers pay their head cutters salaries ranging from four to seven thousand dollars a year. It is clothing of this superlative sort which abounds here at prices ranging from \$15 to \$30. Some of the cloths are fine imported stuffs, in handsome checks and plaids. In finish and quality these goods are quite equal to custom work. Indeed, we have sold more than one suit this season to men who hitherto have had their clothing made to order. The trouble is few can be had to realize without seeing the perfection that has been attained. They only need to see to be convinced.

### A GIRL KIDNAPED BY HER UNCLE.

### Banquet Lowers the Mile-and-a-Quarter Running Record—Another Tornado.

### A KIDNAPING CASE.

### The Child Now on a Steamer Bound for San Francisco.

New York, July 17.—The Times says: When John C. Connelly kidnapped his little niece Violet Nevine as she was walking along the city streets, he was accompanied by his cousin, Miss Martin, about a month ago, and shipped the child off to its mother's home in Ireland, where it was in America, in care of the stewardess of the steamer State of Indiana, he probably thought that he had done a very clever piece of work.

Connelly had been proceeding against the child's Protestant relatives in Ireland, and had been ordered by a Irish judge to produce the child in court. Connelly has a very difficult task before him to secure the return of Violet, for it has been ascertained that she is now on her way to California relatives, one married woman in San Francisco, and the other sister Alice, who is now in the city of New York. The child was taken to St. John's, Ireland, where it is in the charge of the Sisters of Mercy. After the fact of her having been kidnapped was published, her new friends found for her with friends, pending the expected arrival of friends from San Francisco to escort her to her Western home. Weeks passed without any of them putting in an appearance, and finally Violet's aunt, Mrs. Connelly, who is now in the city of New York, sent her to her destination in the care of some trustworthy person. The latter, however, failed to include any remuneration for Violet's outfit or expenses. The Sisters of Mercy, who have advanced the necessary funds, Sister Alois, who has taken the deepest interest in Violet during her stay in this city, decided to send her by the steamer State of Indiana, which is now on her way to California, and she was accompanied by the steamer San Marcos and delivered her to the stewardess.

A Scotch lady and her husband, who were making the trip in the same steamer, became interested in the child, and proposed to the sister to help her for her during the voyage, which will last about twenty days. When it was ascertained that the sister had purchased for Violet an entire outfit of clothes, and she started on her voyage to the Pacific coast, the sister's mother, who is now in the city of New York, immediately telegraphed to the Sisters of Mercy to stop her from leaving, and she was returned to her mother's care. The sister's mother, who is now in the city of New York, immediately telegraphed to the Sisters of Mercy to stop her from leaving, and she was returned to her mother's care.

### At Toledo—Rochester, 2; Toledo, 3.

### At Louisville—Cincinnati, 3; Louisville, 6.

### At St. Louis—Athletic, 4; St. Louis, 3.

### STILL BLOWING.

### Minnesota Towns Visited by Another Storm.

### St. Paul, July 17.—Another heavy storm visited this part of the State yesterday evening. At Red Wing and Lake City a heavy hail storm, which did considerable damage to the crops. At a little town near Stillwater, as well as Stillwater, hail was reported, but the latest advices conveyed were that the storm was not so severe as it was at first reported. The storm struck there at 8:20 o'clock, and for a few moments the southern limit of the storm was driven before a furious gale, with cyclonic winds on the lookout, and there was the wildest consternation, but the storm veered off to the east and passed on. A two-story brick building crashed together like an egg-shell. The loss will probably reach \$100,000.

### THE STEAMER DISASTER.

### Stories Told by the Captain and Engineer.

### St. Paul, July 17.—Captain Wetheren and six of the crew of the steamer S. Wing have arrived in the city today. The Government inspectors are conducting an investigation behind closed doors. Captain Wetheren and six of the crew have been given to the press a statement of the disaster. They say: "The steamer had been recently in-

spected and found to be in good condition, and with the exception of a few minor repairs, was allowed 250 passengers. There were on the boat and barge 200 floats, 187 corks, 100 life-preservers, 100 good skiffs. When the boat left Lake City the number of passengers was under 185. The boat struck at 8 o'clock and proceeded on the lake about 10 miles, when it struck the rock. The boat was completely overturned. The Captain was at the wheel and did not leave the boat until it was completely overturned. The boat headed into the wind and remained in the pilot-house until completely overturned. The boat headed into the wind and remained in the pilot-house until completely overturned. The boat headed into the wind and remained in the pilot-house until completely overturned.

### FARMERS' ALLIANCE.

### A State Ticket Nominated and the Convention Adjourns.

St. Paul, July 17.—At the Farmers' Alliance and United Labor Convention this morning the McKimley bill was adopted. The committee on Resolutions, which was adopted, it demands that the "war" be radically revised and especially that the McKimley bill be amended. The McKimley bill is a demand for Government control of the railroads, favors the increase in the volume of money, and demands the free coinage of silver.

### The Afternoon Session was exciting, at which there was an expression of bitter-

ness on the part of one faction of the Alliance against the leaders of another. The McKimley bill was adopted, it demands that the "war" be radically revised and especially that the McKimley bill be amended. The McKimley bill is a demand for Government control of the railroads, favors the increase in the volume of money, and demands the free coinage of silver.
